Results-driven technologist and MSc AI candidate at Northeastern University London with 3+ years of enterprise IT experience. Skilled in Python, machine learning, and data analysis (Pandas, NumPy, Scikit-learn). Proven ability to translate complex technical concepts for non-technical stakeholders and deliver impact under pressure.

Skills

Programming:	Python (primary), SQL, JavaScript, C++, Git, Docker, AWS
Data Analysis:	Pandas,NumPy,Matplotlib,data pipelines,ETL concepts
Tools:	ServiceNow,Active Directory,Bomgar,Tanium,Salesforce CRM Core
Strengths:	Problem-solving under pressure, SLA management, cross-team communication, fast learner

Work Experience

Senior Analyst – IT Support **Jun 2023 — Dec 2025**
Capgemini, India

- Acted as technical bridge between front-line operations and development/IT teams translating business requirements into actionable technical solutions
- Managed and prioritised 50+ daily incidents using ServiceNow, consistently meeting SLA targets in a high-pressure, performance-monitored environment
- Used Python scripting to automate repetitive reporting tasks, reducing manual effort in incident tracking and follow-up
- Administered user accounts, access permissions and endpoint compliance across enterprise environments using Active Directory and Tanium
- Onboarded and mentored new team members on tools, workflows, and support procedures
- Diagnosed and resolved complex technical issues remotely using Bomgar, minimising downtime for business-critical operations

Associate Technical Support **Aug 2022 — Jun 2023**
Tech Mahindra (IBU TAC), India

- Provided dedicated technical support for Netgear and Orbi networking devices, resolving complex configuration and connectivity issues
- Managed all case records using Salesforce CRM with accurate logging and timely SLA-compliant follow-ups
- Resolved escalated issues independently, consistently receiving positive customer feedback

Associate Customer Support **Aug 2021 — May 2022**
Tech Mahindra, India

- Delivered customer support for JioMart e-commerce platform in a high-volume contact centre environment
- Managed and tracked all customer cases using **Kapture CRM**, ensuring timely resolution and accurate record keeping
- Developed strong communication, active listening and problem-solving skills in a fast-paced environment
- Consistently received positive feedback from customers and recognition from supervisors for reliability and work ethic

Education

MSc Artificial Intelligence & Computer Science, *Northeastern University, London* 2025 — 2027
Postgraduate Diploma in Computer Science, *IIIT Bangalore, India* 2025 — 2026
Bachelor of Computer Applications (BCA), *Chandigarh University, India* 2021 — 2024
Diploma in Computer Science, *Kalinga University, India* 2018 — 2021

Projects

Python Data Analysis Pipeline | *Python, Pandas, NumPy, Matplotlib* Built end-to-end data analysis project ingesting, cleaning and visualising real datasets to extract actionable insights
Machine Learning Classification Model | *Python, Scikit-learn* Developed supervised ML model with full preprocessing pipeline and feature engineering

Certifications

Foundations of Responsible AI, *Northeastern University* 2024
AWS Cloud Technical Essentials, *Amazon Web Services* 2023
Foundations of Cybersecurity, *Google* 2023
Python Programming, *upGrad* 2022
